www.nyceal.org

Why do I need an updated COVID-19 vaccine?

- Updated COVID-19 vaccines protect you from severe illness, hospitalization, and death.
- Over time, the vaccine's protection may decrease. An updated vaccine gives you more protection against COVID-19 illness and variants.

Who needs an updated COVID-19 vaccine dose?

- Everyone 6 months and older who has not yet received an updated vaccine dose.
- You may be eligible for additional updated COVID-19 vaccine doses if:

  - You are 65 years or older and got your first COVID-19 vaccine 4 or more months ago.
  - You are immunocompromised and received a COVID-19 vaccine 2 or more months ago.

Where can I get the updated COVID-19 vaccine?

Contact your health care provider or go to https://vaccinefinder.nyc.gov/ to find a location near you.
